Professional Summary

Motivated Bachelor of Information Management (BIM) student in the 8th Semester with hands-on internship experience in network technical support (Vianet Communications) and database engineering for a Hospital Information Management System (HIMS) at Danfe Health. Skilled in SQL, MySQL, database design, networking fundamentals, IP addressing, troubleshooting, and WordPress web development. Seeking an IT internship or entry-level role to deepen technical expertise and contribute to organizational goals.

Work Experience

Network Technical Support Intern — Vianet Communications

3 Months

- Assisted in network troubleshooting and ISP technical support operations for end-users.
- Resolved connectivity and network-related issues, improving customer support response workflows.
- Gained practical exposure to ISP infrastructure, network devices, and protocols in a live environment.
- Supported network monitoring tasks and documented recurring technical issues for team reference.

Database Engineer Intern (HIMS) — Danfe Health

2 Months

- Worked on Hospital Information Management System (HIMS) database design and data operations.
- Assisted in structuring data entry workflows, query handling, and database schema maintenance.
- Gained exposure to healthcare data systems, database management, and information systems concepts.
- Collaborated with the technical team on system understanding and data management workflows.

Education

Bachelor of Information Management (BIM)

2022 – Present

Orchid International College, Kathmandu | Tribhuvan University | 8th Semester

+2 Science

2020 – 2022

Janjyoti Secondary School, Bardiya

Technical Skills

Programming: Python

Database: SQL, MySQL, Database Management, Database Design, ER Diagram Design, Normalization, CRUD Operations, phpMyAdmin, MySQL Workbench

Web Development: HTML, CSS, WordPress, Content Management Systems (CMS)

Networking: Networking Fundamentals, IP Addressing, Network Devices & Protocols, ISP Support, Troubleshooting

Tools: VS Code, GitHub, Microsoft Office Suite

Concepts: Information Systems, MIS, HIMS, Software Documentation, Technical Support

Projects

Student Record Management System / Python, MySQL, Database Design

- Built a database-driven system to manage student records with efficient data retrieval.
- Implemented full CRUD operations (Create, Read, Update, Delete) for student data management.
- Applied database normalization techniques and ER diagram design to optimize schema structure.

E-Commerce Website / WordPress, HTML, CSS, CMS

- Developed a functional e-commerce website using WordPress with full product and content management.
- Configured pages, product listings, and CMS backend for structured content delivery.

Doctor Appointment System / *Software Documentation, SQL, Database Design*

- Designed software requirement specifications and system documentation for an appointment platform.
- Structured a relational database schema for doctors, patients, and appointment scheduling workflows.

Soft Skills

Problem Solving | Team Collaboration | Communication | Adaptability | Time Management | Quick Learning | Willingness to Learn

Career Objective

To secure an IT-related internship or entry-level position where I can leverage internship experience in networking and database engineering, along with skills in SQL, MySQL, troubleshooting, and web development, to enhance technical expertise and contribute meaningfully to organizational success.
